### Infosys Springboard Overview

In alignment with the Infosys' ESG Vision 2030, the initiative for enabling digital skills at scale, Infosys Springboard (<https://infosyspringboard.onwingspan.com>) has been identified as a flagship intervention to empower people, communities, and society. Through this initiative, Infosys plans to empower over 10 million people with digital and life skills by 2025. The reach will include students across India in the age group of 10-22 years as well as lifelong learners.

Infosys Springboard is powered by Infosys Wingspan, our integrated digital learning and collaboration platform and includes learning content developed by Infosys and leading content providers, spanning digital,

emerging technologies and life skills. For a holistic learning experience, the platform has technology and soft skills playgrounds, programming challenges, and social learning features. The program is led by a dedicated team of experts collaborating with the Education Training and Assessment (ETA) department, NGO partners, and established networks of identified educational Institutions.

Soon, Infosys Springboard will be available in major Indian languages. As of now it is available in English, Hindi, Tamil, Telugu, Kannada and

Marathi. Dedicated Maker Labs are planned in major Indian cities to provide hands-on learning opportunities in the emerging technologies.

We are also in the process of setting up Makers Lab on wheels to ensure even remote schools of Indian villages can also get access. We are glad to share that there are about **1.49 million plus** learners across India registered on the platform and getting benefited. We have also recently concluded Infosys flagship program, Catch Them Young 2021 for school kids above 6th grade, which was attended by 10000+ school students across India.
