Event Report

Name of event: Study Visit

Place of visit : Water Filtration Plant, Dhuktan

Date of visit : 17 December 2019

No. of Participants: 23

Objectives of the visit :

Educational Tours for students provide them with an opportunity to collaborate with teachers, and integrate new perspectives with informal environments to enhance learning initiatives. Among the many educational tour benefits, skill development is the most important. In order to meet several educational tour objectives, students need to apply skills, values and general knowledge in new settings.

- Effective Learning
- Personal Development
- Enhances Perspective
- Effective Communication
- Deepen Social Knowledge

What students learned during the visit :

Students were energized by the excitement and anticipation of leaving the college environment.

The transportation to and from the site is often a pleasant open-social time.

Students had the opportunity to see new things and learn about them in a more unstructured way.

Students had the opportunity to determine what they learn and how they learn it. Said differently, student learning can be interest-driven, not teacher and curriculum driven

Students experienced a more holistic, integrated picture of the information that, in the classroom, may have only been presented in a textual and abstract way.
