Report on Street Play on Segregation of waste 2019-20

1. Title of the Activity/Event/Practice

Street Play on Segregation of Waste

2. Objectives

- To separately store recyclable material for reuse
- To ensure that waste which can be processed for recovery of material and energy does not become co-mixed with undesirable elements
- To separately store hazardous waste for disposal in hazardous waste landfills or for appropriate processing
- To minimize the waste and ensure reduction in and fill space for final disposal.

3. The Context

Waste segregation facilitates the process of reuse, recycling, and recovery of waste. Segregating waste can improve the recycling process. For example, separating wet waste from dry waste is a simple way to help recycling companies. It will help to recycle non-biodegradable waste and treat biodegradable waste directly.

4. The Practice

On 4th December 2019, the NCC Cadets of Sonopant Dandekar College organized a street play on the segregation of waste, to make people aware of its importance and the damage it can cause on the environment.

5. Outcomes

- 1) Cadets successfully demonstrated their play.
- 2) The aims of the street play i.e to make people aware of storing wet and dry garbage in different dustbins, and to store recyclable material for reuse, were achieved.
