COVID -19 Protocol

COVID-19 protocols are a set of rules and procedures designed to limit the spread of the coronavirus disease 2019 (COVID-19). These protocols are implemented by governments, organizations, and individuals to reduce the risk of infection. Our guest introduced various demos to DLLE students which included practices such as wearing masks, maintaining physical distance from others, practicing good hand hygiene, sanitizing surfaces regularly, etc. These protocols are essential for protecting public health and preventing the spread of COVID-19.

Objective: -

1. Implement and enforce strict hygiene measures, including regular handwashing, sanitization of frequently touched surfaces, and wearing masks, to minimize the spread of COVID-19.
2. Educate individuals and communities about social distancing guidelines and the importance of vaccination to reduce the risk of transmission and protect public health

Outcome:

1. Students will demonstrate the ability to follow and adhere to COVID-19 safety protocols, including proper hand hygiene, mask-wearing, and maintaining physical distancing.
2. Students will understand the rationale behind COVID-19 prevention measures, such as the importance of vaccination, and be able to communicate this information effectively to others to promote community health and safety.

Participants:

1. Chief Guest
2. Extension Teacher
3. DLLE students
