#### **About the event:**

It is almost certain that we cannot undo the effects we have created on this planet. But we are not late either to start a difference. Every small step counts. Like Gandhi said, “Be the change you wish to see in the world.” Rest will follow for sure. Global Warming has become a very alarming situation. The future of this planet is in question. We are supposed to return this planet the way we received it. We are the only tenants on this beautiful planet and must give back what we have taken. It is never too late to start working for the betterment of our beautiful world.
