(DLLE)

Each one Teaches one Activity

"Each One Teach One" is a concept that encourages individuals to share their knowledge and skills with others. The idea is that when someone learns something new, they should pass that knowledge on to another person, creating a cycle of learning and empowerment. Our guest introduced this approach to all DLLE students and used it in educational settings and community programs to promote education and skill development. It also highlights the value of sharing knowledge and helping others learn, which can have a positive impact on individuals and communities.

Objectives: -

1. Facilitate a student-centered learning environment by promoting active participation, critical thinking, and collaborative problem-solving in classroom activities.
2. Implement differentiated instruction strategies to meet the diverse learning needs of students, including scaffolding, enrichment activities, and personalized learning experiences

Outcomes: -

1. Students will actively participate in classroom discussions, engage in critical thinking exercises, and collaborate effectively with peers to solve problems and analyze concepts

Participants:

1. Chief Guest
2. Extension Teacher
3. DLLE students
