PROPOSAL

Date: 3/10/2019

To,
The Principal
Dr. Kiran Save,
Sonopant Dandekar Arts, V.S. Apte Commerce and
M.H. Mehta Science College,
Palghar

Subject : Proposal for Organizing an 'Industrial Visit to Chandigarh'

Name of the Programme: Industrial Visit to Chandigarh

Organizer : Department of BMS (Management Studies)

Proposed Day & Date – Thursday, 16th January to Wednesday, 22nd January, 2020

Objectives –

- To provide BMS and BAF students with practical exposure to the manufacturing and business operations of a solar energy company
- To enhance students' understanding of the solar energy industry and its impact on the environment and economy
- To enable students to observe and analyze the practical application of management and financial concepts learned in the classroom
- To encourage students to develop critical thinking, problem-solving, and decision-making skills in a real-world setting
- To provide students with an opportunity to interact with industry experts and gain insights into career opportunities in the solar energy sector

To
The Manager
Inter Solar Visit
Chandigarh

Sub: Industrial Visit

Respected Sir/ Madam,

We are the management institute in this area and provide management education to the students of this area. As per the Mumbai University BMS norms, students are supposed to do regular industrial visits for enhancing their practical knowledge. we will be obliged if you permit our students to visit your plant.

This will surely help them in developing their managerial abilities and to understand the internal environment of an organization.

Looking forward for your co-operation

Thanking you in anticipation

S.S. Michra

Department of Management Studies

Report on Industrial Visit

Place of visit: Amritsar & Chandigarh

Date of visit: 16/01/2020 to 22/01/2020

No. of students: 69

Objectives of the visit:

- To provide BMS students with practical exposure to the manufacturing and business operations of a solar energy company
- To enhance students' understanding of the solar energy industry and its impact on the environment and economy
- To enable students to observe and analyze the practical application of management and financial concepts learned in the classroom
- To encourage students to develop critical thinking, problem-solving, and decision-making skills in a real-world setting
- To provide students with an opportunity to interact with industry experts and gain insights into career opportunities in the solar energy sector

About the visit:

An industrial visit to a solar energy company in Chandigarh offers an exciting opportunity to explore the various aspects of solar energy production and its commercialization. With the increasing demand for renewable energy sources, the solar energy sector is booming, and a visit to a solar energy company can provide a practical understanding of the field.

The first thing that visitors can expect is to get a glimpse of the company's solar panels and other equipment used in the production of solar energy. A guided tour will highlight how the panels work to convert sunlight into electricity, and how the company manages to optimize the efficiency of the process to generate more clean energy. Visitors can also expect a briefing on the latest technological advancements in the field and how these innovations are helping the industry to grow rapidly. It can be fascinating to see how solar energy companies are integrating smart technologies like IoT, AI, and Big Data to enhance the efficiency of the entire solar energy value chain.

Overall, an industrial visit to a solar energy company in Chandigarh can be a fascinating and educational experience for students, professionals, and anyone interested in renewable energy. So, if you get a chance to visit a solar energy company, go for it and learn about the advancement of solar technology.

What students learn during the visit:

Understand the solar energy industry and its role in addressing environmental concerns and reducing carbon emissions. Observe and analyze the practical application of management and financial concepts in a real-world setting, specifically in the context of a solar energy company. Identify the challenges and opportunities facing the solar energy industry and how businesses can address them. Develop critical thinking, problem-solving, and decision-making skills by analyzing and evaluating the operations and processes of a solar energy company. Apply the knowledge and skills gained from the industrial visit to their future academic and career pursuits.
